Senior Functional Safety Engineer · Autonomous Driving

Functional safety engineer with seven years in automotive and autonomous-driving safety, currently owning functional safety for Vay's remote-driving system, among the first cleared for driverless operation on public roads in Europe. Comfortable at the customer and partner interface, having led safety integration into a B2B customer's product and prepared safety concepts directly with OEM architects. Hands-on across the full ISO 26262 and ISO 21448 lifecycle, experienced in leading external safety assessments, and now leading the safety work as Vay moves toward an AI-based remote driver.

FUNCTIONAL SAFETY

ISO 26262
ISO 21448
UL 4600, FMVSS
HARA, FMEA, FTA, FMEDA
Safety cases, FSC / TSC, DIA

SYSTEMS ENGINEERING

Requirements & traceability
JAMA, DOORS
V&V (HiL & vehicle level)
V-model development
C/C++, Python (general working knowledge)

AI & AUTONOMY

Safety of AI models for remote driving
Remote safety-driver fallback
Driverless public-road operations
ISO/IEC TS 5083

EXPERIENCE

Senior Functional Safety Engineer

Vay Technologies GmbH · Berlin, Germany · 09/2023 – Present

- Own functional safety for Vay's remote-driving system, driving ISO 26262 compliance across the systems, hardware, and software teams from concept through real-world driverless operation on public roads.
- Own and author the safety case as per UL 4600, define the functional and technical safety architecture, including system-level redundancies, for the remote-driving platform.
- Lead the safety work for Vay's move toward an AI-based remote driver, bringing AI into safety-critical driving functions..
- Analyse and ensure FMVSS compliance for Vay's remote driving operations in the United States.
- Act as safety lead for integrating the remote driving stack into a B2B customer's autonomous driving product as a fallback layer, working directly with the partner's safety and engineering teams on architecture, integration, and safety deliveries.

Functional Safety Engineer II

Vay Technologies GmbH · Berlin, Germany · 06/2022 – 08/2023

- Owned the Minimal Risk Maneuver (MRM) feature end to end, from systems and concept through functional safety, applying ISO 26262, UNECE R 157, and ISO 4804.
- Led the external functional safety assessment with independent auditors, enabling safety certification of the system.
- Performed safety analyses (FMEA, FTA) and supported verification and validation at hardware-in-the-loop (HiL) and vehicle level.

Functional Safety Engineer I

Vay Technologies GmbH · Berlin, Germany · 06/2021 – 06/2022

- Helped establish the in-house functional safety function and processes from scratch.
- Implemented safety requirements management and traceability in requirements management tool (JAMA).
- Contributed to the company's first successful external safety assessment.

Functional Safety Engineer / Manager

BERNS Engineers GmbH · Gilching, Germany · 01/2020 – 06/2021

- Prepared safety concepts and analyses (FSC, TSC, HARA, FTA) for OEM customers and worked directly with their architects on ASIL D ADAS features.
- Served as functional safety manager on certain projects, owning the safety plan and overseeing supplier safety activities.

Functional Safety Engineer

AKKA Technologies · Ingolstadt, Germany · 06/2019 – 12/2019

- Supported ISO 26262 development for an ASIL B system and managed vehicle configuration data.

Junior Executive

Fleetguard Filters Pvt. Ltd. · Pune, India · 08/2013 – 09/2015

- Managed production part approval process (PPAP) activities across manufacturing suppliers, including process FMEA, and process flow documentation; reduced component cost by ~25% through supplier negotiations.

EDUCATION

M.Sc. Mechanical Engineering

Rhine-Waal University of Applied Sciences · Kleve, Germany · 10/2015 – 04/2019

B.E. Mechanical Engineering

Visvesvaraya Technological University · Belgaum, India · 08/2009 – 04/2013

CERTIFICATION

CertX – ISO 26262:2018 Functional Safety Red Belt (03/2021)
